

Predya will be an Investment Firm and currently working on Proprietary Artificial Intelligence Model designed to predict the future value of Cryptocurrencies. It is engineered to profit consistently from Digital Assets fluctuations with advanced and rigid Risk Management techniques.

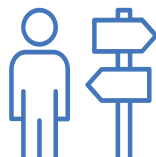

Predya S.A is duly incorporated in Luxembourg, prime European Financial Center.

What are the problems Predya solves ?

Problems

Forecast the value of cryptocurrencies with accuracy

Anticipate volatility spikes

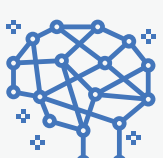

Make investment decision 24/7/365

Take emotions out of Trading

Our Solutions

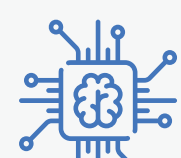

Use of Artificial Intelligence to process large amount of targeted data, find correlations and deliver a real time trading order: Buy/Hold/Sell

Use of Machine Learning to learn from patterns and news and anticipate the level of upcoming volatility

Use the Systematic strategy to trade the cryptocurrency market relentlessly without pause

Use of Algorithms for utmost discipline to prevent being clouded by emotions
